

ONE OF THE MOST IMPORTANT TOOLS IN THE TOOLBOX

Analytics training is always at the forefront of a successful organization's effort to stay ahead of technology. Your competitive advantage in hiring and retaining top talent depends on understanding the skills needed to work efficiently. However, often the realities of daily workloads get in the way of making time for training initiatives, or even determining the best training opportunities available to your staff.

OUR TRAINING CAN HELP

- A 25 week curriculum which focuses only on tools familiar to Business Professionals in the Microsoft suite.
- Promotes skills directly transferrable to making day to day analytical tasks simple, thereby promoting efficiency and saving time.
- Offers advancements in understanding the tools to allow staff to be creative in solving operational issues.

Analytic Training Focused on Financial Professionals Performed by Akseshen Financial Professionals

We all know there is a myriad of training tools available to organizations, however, often the day to day business activities make it difficult to even begin the research process to find the training that fits the organization's objectives. Then, the time involved to watch, absorb, and practice can be excessive. Not to mention trying to find relevant examples.

Our training curriculum is fluid, focuses on the most common needs of business professionals. We focus on what you use, the Microsoft suite of analytical tools and incorporate a method of advancing current activities for efficiency.

We start by assessing our user skill base, move forward from their level of understanding, giving them benefits & new options for analytics.

We employ a well-paced approach that is customized to specific business scenarios experienced, but also provide an unobtrusive experience and teach skills that are immediately transferrable to your day to day activities.

ANALYTIC TRAINING OFFERINGS:

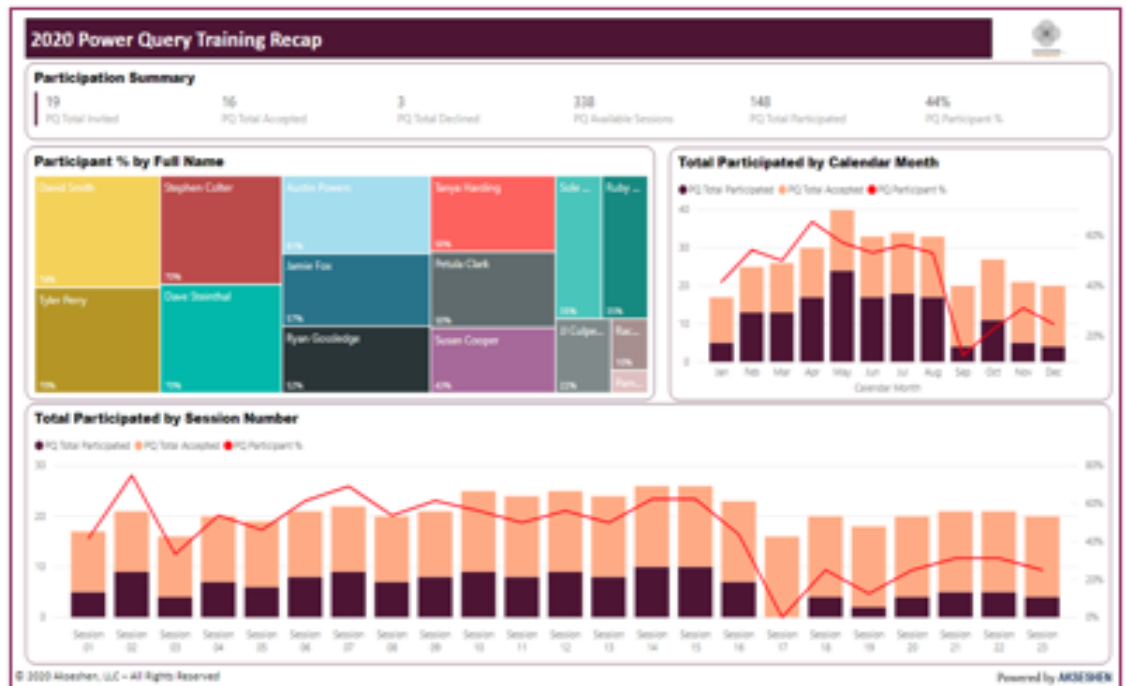

- **Excel** – Easy to Advanced skill flow, working toward more advanced analytic features & focused on eliminating traditional pinch-points experienced in working with large amounts of information.
- **Power Query in Excel** – Advanced yet simple to use analytics to complement your Excel skills and take analytic representations to the higher level of presentation and flexibility. Working with data sets, creating data transformations for analysis, building data models and analytical dashboards. You already have Power Query in your base Excel program, so why not use it and become a champion of advanced analytics?
- **Power BI** – Introduction to the Microsoft Power BI environment, which is the ultimate business analytics workspace. Covering data connections, transformation, and dashboard build process. You will find Power BI to be easy to use and hugely impactful in publishing and navigating your organization's business results.

About Our Training...

Continuing:

- Reopen the Data Model window. 1
- Ribbon Menu, Date Table drop down box. 2
 - Select 'New'.
- Set Date Range: 3
 - Start Date: 1/1/2019
 - End Date: 12/31/2020

Our Materials - We conduct classes live every 2 weeks and provide complete walk through instructions ahead of our sessions, allowing for plenty of time to review materials. We like to conduct the sessions with the “volunteer” method, where a selected individual is the presenter, to heighten engagement. Additionally, we record all sessions and make available to folks that might miss the session.

Our Participation Breakdown - Periodic update sessions with coordinators to provide 180 feedback and we provide statistics in order to understand team commitments, foster engagement, and participation.
